

3M Science.
Applied to Life.™

High gloss. Less effort.

Reduce the labor and product cost associated with your routine floor maintenance.

3M™ Advanced Floor Care System

Change your products, not your process.

Get a first-class shine without all the burnishing, scrubbing, stripping and recoating — or the harsh chemicals. The 3M™ Advanced Floor Care System helps you get the results you want with the tasks you do every day.

- **Beautiful appearance.** High gloss with less labor and fewer chemicals.
- **Cost savings.** Fewer needed procedures; and less equipment and product use means lower total cost of ownership.
- **Less labor and disruption.** Reduced need for the recurring maintenance tasks that are most disruptive to your facility and your guests.
- **Protect your investment.** As use of hand sanitizers becomes more widespread, protect your floors with a coating that can resist the surface damage they can cause.

For best results, use all the elements of the 3M Advanced Floor Care System as part of your routine floor maintenance. Using the whole system can significantly reduce or eliminate the need for burnishing.

Two tasks. One product.

3M™ Clean & Shine Daily Floor Enhancer

Choose a daily cleaner that does double duty. As facility-management priorities shift, so will the attention to allocation of labor and product cost. 3M Clean & Shine Daily Floor Enhancer is a two-in-one product that may help to reduce your labor and chemical usage while meeting the standards you need for daily floor cleaning — and improving your floors' qualities over time.

- Enhances the gloss of floors — and maintains those that already have a high gloss — as part of your daily cleaning routine, reducing the need for burnishing.
- Reduces the frequency of major floor care projects, like top scrubbing and stripping, that disrupt your facility.
- Has superior cleaning ability when compared to other neutral cleaners and restorers.
- Won't haze or damage floor finish when used daily as directed.
- Ideal for health care facilities; schools; and large, high-traffic buildings like stadiums, airports and event centers.

Clean and shine floors in one step.

Scotch-Brite™ Clean & Shine Pads

Get a stunning reflection with less time, effort and equipment. Scotch-Brite Clean & Shine Pads gradually increase shine with each use to simplify floor maintenance. When used for daily cleaning, they improve gloss and reflection over time — reducing the need for burnishing.

- Effective on floors with either a high or low starting shine.
- Work with just water or neutral cleaner.
- Remove black marks 3X faster than traditional cleaning pads.
- Last longer than traditional cleaning pads for lower overall cost and reduced waste.
- Can be used on most coated and uncoated floors, including VCT, vinyl, stone, terrazzo, concrete, marble, linoleum, granite and rubber.

Certified by Green Seal® for Environmental Innovation based on a design for significantly improved initial performance compared to competitive products, extending the useful life of the floor pad and reducing solid waste generation.

Improve on acrylics.

Scotchgard™ Protect & Shine Floor Protector

Get the high-gloss floor you desire with less labor and long-term expense than other floor finishes. Unlike typical finishes, including acrylics, that require routine burnishing and are prone to scuff marks and damage from hand sanitizer, Scotchgard Protect & Shine Floor Protector maintains your high-gloss floor without the labor and expense of other floor finishes — and it's resistant to damage from hand sanitizers that are in wide use with the increased focus on the health and safety of building occupants.

When compared to the leading acrylic floor finishes, Scotchgard Protect & Shine Floor Protector:

- Reduces maintenance — requires less chemical stripping than acrylic floor finishes, and may require less or no burnishing.
- Provides hand sanitizer resistance.
- Better abrasion and soil resistance.
- Gives you similar shine and superior gloss retention.

The water-based formula protects resilient flooring surfaces such as vinyl, vinyl composition tile (VCT), luxury vinyl tile (LVT), vinyl sheet, linoleum and rubber.

A system that fits your routine.

The 3M™ Advanced Floor Care System helps you achieve a beautiful, high-gloss floor while reducing maintenance costs. **For best results, incorporate all three products into your routine maintenance.**
