Special Micro Periosteal Elevators

- :BLUE TITANIUM OXIDE Coating.
- :Special crystalline surface structure in the BLUE PLASMA process.
- :Blue Plasma working tip for perfect contrast for the working area.
- :Light ergonomic and matt finish Ø10 mm hollow handle for fatigue-free
- :Very hard and scratch-proof surface.
- :Sterilization & Autoclavable.

Micro Periostótomos Especial

- :Revestimiento de OXIDO DE TITANIO AZUL.
- :Estructura superficial cristalina realizada mediante un proceso de asistido por PLASMA AZUL.
- :Parte activa de color Azul oscuro que ofrece un contraste perfecto el área de trabajo.
- :Mango hueco Ø10mm satinado, ergonómico y ligero para un trabajo sin cansancio.
- :Superficie dura y extremadamente resistente a los arañazos.
- :Esterilización y Autoclave.

Syringe for intraligamental anaesthesia / Jeringa para la anestesia intraligamentaria

Stainless steel syringe with advanced technology with an angled working tip to provide very easy access specially to the distal area · double sided easy-touse bayonet catch – therefore the cylinder can be moved either in position for the upper or the lower jaw to be used for a 1.8ml anesthesia cartridge · with anti-bursting sleeve · 0,06ml of an aesthetic is injected with each press of the syringe · can be used for tank and/or thermal disinfection as well as sterilization.

Acero inoxidable jeringa con tecnología moderna parte activa angulada para un uso óptimo también en el sector posterior. Cierre de bayoneta bilateral que permite orientar el soporte de la ampolla tanto hacia el maxilar como hacia la mandíbula. Para el uso de ampollas cilíndricas de hasta 1,8 ml Con protector antifractura. Aplicación de 0,06 ml con cada carrera de émbolo Indicado para el acondicionamiento en desinfectador térmico y autoclave.

381-SYG-206

1,8ml EU

Syringe for intraligamental anaesthesia / Jeringa para la anestesia intraligamentaria

Stainless steel syringe autoclavable up to 130°C anti-bursting sleeve the cylinder is secured with an easy-to-use bayonet catch the treble window in the cylinder provides for optimum control over an aesthetic usage.
