

MOBILE PHONE

Did you know that each kilo of coltan cost the lives of two people in the Democratic Republic of Congo (DRC)?

2 years

is the average lifetime of the mobile.

75 kg

is the ecological backpack of your smartphone

In **10 years** **7 billion**

mobile phones have been manufactured in the world, the same amount than inhabitants.

By **2020**

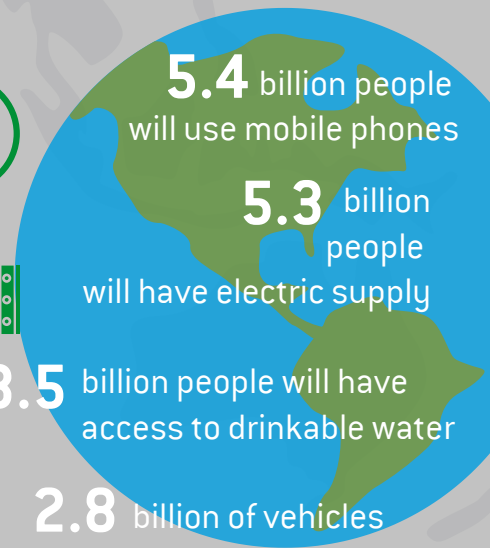

5.4 billion people will use mobile phones

5.3 billion people will have electric supply

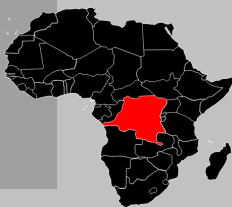

3.5 billion people will have access to drinkable water

2.8 billion of vehicles

All this cause

**EXPLOITATION
WAR
VIOLATIONS ON DRC**

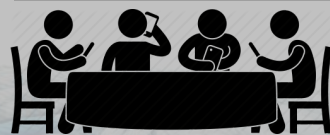

5 million of deaths since 1998

4.5 million of people displaced during 2017

More than **10000** annual violations to women

**DISEASE
ADDICTION**

We look at the mobile once every 10 minutes without counting the sleep hours

**CONTAMINATION,
VOLUME AND TOXICITY
OF RESIDUES**

CO₂

To compensate the CO₂ emissions we would have to use our mobile phone for more than 33 years

What's the progress?

EU regulation to prevent human rights violations related to illegal trade in minerals

SDG 12:
Ensure sustainable consumption and production patterns by 2030.

Due Diligence Guide of the OECD

Mine Certification in DRC

#connectmobilepoverty

Learn about the case of the Democratic Republic of Congo, where

80%
of the world's
coltan reserves are
located.

JUDGE: ANALYSE THE FACTS

“

Overcome the technocratic model
Green Decalogue

Yet we can once more broaden our vision. We have the freedom needed to limit and direct technology; we can put it at the service of another type of progress, one which is healthier, more human, more social, more integral.

Laudato Si', 112

ACT: ENCOURAGE YOURSELF TO IMPLEMENT TRANSFORMATIVE ACTIONS

Calculate and reduce your mobile phone usage

Extend the life of your mobile

Before buying a mobile:
- Reuse
- Second-hand purchase
- Discover the Fairphone
